Thomas C. Pawelkowski
Superintendent

Modification of Meter Size in Commercial Buildings

The following conditions are required in order to receive a meter modification. The property owner must purchase all water meters from the Water Division and remain the property of the Warren Water Division. No refunds will be issued. Should the owner decide to change his meter back to the original size at a later date, he will be required to purchase the required original size meter prior to the modification. There will be no credit given for old meter.

Original meter sizes were determined according to the fixture demand and flow requirements at the time of original installation. All plumbing must comply with the "Michigan Plumbing Code 2009". You are required as the building owner to consult with a "licensed Master Plumber" or "Registered Plumbing Engineer" to ensure proper meter sizing is being requested. A plumbing permit is required from the Building Department. Please be advised that by signing this document the owner agrees to these conditions and will not hold the City of Warren responsible for any problems, which may emerge because of this meter modification. Please complete the following information:
