Have you been diagnosed with COVID-19 illness, but are not in the hospital?

Join us in our fight against the virus SARS-CoV-2, which causes COVID-19 illness.

Early Outpatient COVID-19 Plasma Treatment Research Study

Principal Investigator: David Sullivan, MD
Protocol Number: IRB00247590
Clinicaltrials.gov NCT04373460

Our research is funded by the State of Maryland and a private donation
**What is the COVID CSSC-004 study?**
- This study will test whether a transfusion of plasma that has antibodies from persons who have recovered from COVID-19 is a good treatment for patients with early COVID-19 illness.
- Before your transfusion, the blood bank will test the plasma for other infectious diseases.

**What's involved?**
- One plasma transfusion. A computer will assign you by chance to get either plasma with COVID antibodies or plasma without COVID antibodies.
- Up to 5 in-person visits over 90 days
- Medical history
- Physical exam
- Blood tests
- Daily log of symptoms
- Nasal swab testing for COVID-19

**Can I join?**
You may be able to join if you:
- Are 18 years of age or older
- Tested positive with SARS-CoV-2 virus within the past 6 days or less
- Have had any COVID symptoms within the past 6 days or less:
  - cough
  - shortness of breath
  - fever
  - chills
  - muscle pain
  - headache
  - sore throat
  - new loss of taste or smell

**Helpful Definitions:**
- **Antibodies** are part of the body's immune system.
- **Plasma** is the liquid portion of the blood.

**Taking part in this study is completely voluntary.**

**Will I be compensated?**
Yes! Compensation details will be provided by your local study site.
