How To Be Sure You’re Using Your Space Heater Safely

Half of all home heating fires happen during the months of December, January, and February. Follow these safety tips if you use a portable space heater.

- Place the heater on a hard, level, and nonflammable surface. These appliances are intended to sit on the floor, not on a table.
- Establish a 3-foot kid-and pet-free zone around the heater, and never put a space heater in a child’s room.
- Keep the space heater at least 3 feet away from combustible materials, such as furniture, bedding, and curtains. A taller heater may need to be even further away.
- Don’t use a heater in a workshop or garage near paint, gas cans, or matches.
- Turn it off when you leave the room or go to bed.
- Unplug the heater when it’s not in use by pulling straight from the outlet. Check the cord for damage periodically, and don’t use the heater if the cord is frayed or worn.
- Don’t plug another electrical device or an extension cord into the same outlet as a heater – that can cause overheating.
